Early Intervention & Help Me Grow as a Solution

[CBS Segment Health Disparities](#)

"Our #1 priority at the Help Me Grow National Center is replication and implementation of Help Me Grow. We are currently engaged in Help Me Grow in 28 states and 92 systems across the country. We know that Help Me Grow implementation with fidelity to the model is no modest task. The progress that will be made throughout San Bernardino and Riverside counties through Help Me Grow Inland Empire will ultimately mean that more children will be appropriately linked to community-based services and more families will be empowered to support their child's healthy development.

Our impact is growing, thanks to your good work. The use of the Help Me Grow model is an ideal vehicle for early childhood comprehensive system building, and you are engaged in these efforts. We began this work decades ago trying to strengthen the child health services sector in developmental promotion, early detection, and referral and linkage. Together, we are so well positioned to advance the notion of early childhood system building.

I hope this message builds some excitement for what is to come, both with Help Me Grow Inland Empire and nationwide, and I hope to see you at our 10th Annual Forum in Buffalo, NY on May 6-8th."

**- Dr. Paul Dworkin, Founding Director
Help Me Grow National Center**
